Brain Health and Air Pollution

May 13, 2020
10 AM-Noon EDT

About the webinar: Globally, neurological disorders represent the second leading cause of death. While increasing evidence has emerged reporting an association between air pollution exposure and brain health throughout the life course, important research gaps remain. This session provides an overview of the relationship between air pollution and neurological effects in childhood and adolescence, and neurodegenerative disease in adulthood, as well as the physiological impacts on the brain that have been observed using recent neuroimaging techniques.

Speakers
Marc Weisskopf, Harvard University
Deborah Cory-Slechta, University of Rochester
Megan Herting, University of Southern California
Jennifer Weuve, Boston University

Chairs
Barbara Hoffmann, University of Düsseldorf
David Savitz, Brown University
