If you are new to using satellite-derived air quality data for health applications, we recommend the following resources to get started:

**Copernicus** is the European Union’s Earth observation programme: https://atmosphere.copernicus.eu/

**The NASA Health and Air Quality Applied Sciences Team** connects NASA Data and Tools with Health and Air Quality Stakeholders. Information is provided throughout the website, particularly under the Tools and Resources Menu: https://haqast.org/

**The NASA Applied Remote Sensing Training** (ARSET) provides trainings for beginner and advanced users of satellite data: https://appliedsciences.nasa.gov/what-we-do/capacity-building/arset

*This document will be updated following the final workshop session to include resources shared by workshop participants.*
