HEI

The Big Deal About Big Data, Causal Inference, and Accountability Research

April 7, 2020
10 AM-Noon EDT

About the webinar: Accountability research, or evaluating the effectiveness of interventions to improve air quality and public health, remains a topic of high interest. Although there have been some successes, showing effectiveness particularly at increasingly lower air pollution levels is challenging. This session will take stock of recent progress across the globe, including novel statistical approaches and big data; discuss the importance of accountability evidence for the causality debate; and explore what approaches are needed for future research.

Speakers

Jill Baumgartner, McGill University

Douglas Dockery, Harvard University

Neil Pearce, London School of Hygiene and Tropical Medicine

Roger Peng, Johns Hopkins University

Chairs

Jennifer Peel, Colorado State University

Kiros Berhane, Columbia University
